

350 Bay Area Action Candidate Survey - County 2024

Dear Candidate,

Thank you for participating in this survey. This survey is a tool for us to get to know you and where you stand on issues related to climate change and local governance. Estimated survey time 30 minutes. Please return by August 4th.

Sincerely,

350 Bay Area Action Electoral Team

<https://350bayareaaction.org>

Email: Mayor@MayorEllen.com

Name: Ellen Lee Zhou for San Francisco Mayor

County Race - County and District Mayor of San Francisco

Website: www.MayorEllen.com

1, Describe your vision for moving to renewable energy and transitioning away from fossil fuels. Please include what specific policies you would promote at the county level to achieve this and why doing so is important.*

Ellen: This is a local level of office I follow God's nature and God's rule of law to live and honor those who want to live their individual lives. Many of the current policies are from Agenda 2030, which by design to fool and lie to the public about human nature, agenda 2021 failed, and now Agenda 2030 will fail too. God provides water, air, and all resources for all human beings to enjoy.

2. Describe how you would take into consideration low-income communities in the transition off of fossil fuels.*

Ellen: The government should NOT use low-income or poor people to mislead the public about public taxpayers' funds. God's people, the body of Christ is the one resource for charity work, but not the government to control the population.

3. What is your position on natural gas as a fuel? (For this question, "new natural gas projects" refers specifically to gas extraction - wells, drilling, production, etc.)*

Ellen: your Q & A has no open answer for others to answer freely. So, I am not clicking your answers when there is no benefit to utility users or anyone who has an open mind and open heart to use both sides of the brain to think individually.

It's an important fuel source and should be supported in California.

I do not oppose continued investments in new natural gas projects, as long as they protect communities disproportionately impacted by fossil fuel facilities and pollution.

I support natural gas as a transition fuel, but I do not support continued investments in new natural gas extraction or refining and related infrastructure like new pipelines.

I support a phase-out of all natural gas use as soon as possible.

This is a required question

Ellen: Anything that is required without an option is not an American question. Your agency sounds like you are working for the government who controlled the People's needs or wants. I am not answering because I know the answer to your agency, setting up for the deep state to mislead the public, I learned from here: [The United Nations Criminal Agenda is Revealed to the World \(stopworldcontrol.com\)](http://stopworldcontrol.com)

4. The state has mandated the ban on the sale of gas-powered cars in California by 2035. What do you think about this decision, and about this timeframe? Gas-powered cars should be banned from sale in California by:

*

2035 as proposed by Governor Newsom

2040 as suggested as a possible alternate scenario by the California Air Resources Board

2030

Almost immediately - 2025 In line with the Intergovernmental Panel on Climate Change goals

OR: I do not support the policy of California mandating bans on gas-powered cars

Ellen: Agenda 2030 is not for Americans. It is for the deep state globalists, One World Order government. [The United Nations Criminal Agenda is Revealed to the World \(stopworldcontrol.com\)](http://stopworldcontrol.com)

5. If you were appointed to the Metropolitan Transportation Commission board, would you support MTC in declaring a climate emergency and funding a regional plan to fully support California's 2045 goal to eliminate fossil fuels from transportation?*

Ellen: When I am the San Francisco Mayor, my team will focus on local issues, crimes, homeless, car break-ins, law and order, and common laws to protect San Francisco from

agenda 2030, we will welcome businesses to come back with no need to pay a lot taxes like they are paying now. All of San Francisco will be focused on love, joy, and peace, away from the deep state government.

Yes

No

6. What do you see as the big opportunities for your county coming out of the [Inflation Reduction Act](#) (through mechanisms like grants, cooperative agreements, or the [Direct Pay Program](#)), out of the Infrastructure Act, and out of the state of California-funded clean energy initiatives? How might you imagine funds being allocated? (You do not have to answer each point or question, just please share some thoughts.)

*

Ellen: By the time I am in Office, January 2025, lots of the politicians will have been removed from office or passed away or repented, we will work together to transform San Francisco, and focus on local issues. People will have affordable housing, homeowners, and no need to work two to three jobs just to pay. God will show San Franciscans how to enjoy our lives. Many people will receive money from the TRUST, from birth, saving from bonds: <http://reclaimingtherepublic.com/>

7. Appliances that burn methane “natural gas” in buildings, such as water heaters and furnaces, are a major source of greenhouse gas emissions and air pollution. Many cities and agencies such as the Bay Area Air Quality Management District have adopted rules to phase out gas equipment. What is your position on each (check all that apply)

*

Ellen: I am only a Mayor, not a tyrant anymore. People will have their choice of what to use. The government should not control people’s lives but support what they need to live a healthy and safe life. It is up to the residents, building owners, and local safety dept. to ensure things are safe to use.

I would not support requiring all-electric new construction

I would not support requiring all-electric for major remodels of existing buildings

Yes, require all-electric in new construction of single-family homes

Yes in new construction of multi-family homes and commercial buildings, (not including industrial and restaurants)

Yes in the new construction of Restaurants

Yes, I support Air District rules phasing out the sale of gas water heaters in 2027 and furnaces in 2029

Comments (optional) - Please use this space if you wish to comment on or clarify any of the choices in the last segment.

The next two questions are to help us get to know you better on various climate issues. Please answer as best you can. (There is a comment space below each if you want to clarify anything.)

8. Some of the most important decisions you'll make in office involve land use and design. Please rate your support/lack of support for each of the climate change land-use issues below.

*

Ellen: I am a believer in nature, human nature that God gives us everything we need such as water, air, and resources. But it is the Satanic children who altered God's plan, to lie, to cheat, create fear to threaten mankind. I am not falling into this trap because God opened my spiritual eyes to see what is going on now. Wake up America! Wake up 350 Bay Area Action staff! You are not a government. But you sound like you are a governmental agency. You have been used by the wicked leaders above you, I read Psalm 91 to shelter in God's protection: see reference: <https://stopworldcontrol.com/>

I would like to lead on this issue

I am likely to support this

Neutral / I don't know

I am not likely to support this at this time

Design that supports active transportation (such as biking and walking)

Developing dense, affordable, multi-family, transit-oriented housing (without displacement)

Reduction of minimum parking requirements in / near commercial areas

Moving back urban growth boundaries to allow for more housing

Zoning flexibility to allow for more housing, such as auxiliary dwelling units

Banning new gas stations (where needs are reasonably met)

Design that supports active transportation (such as biking and walking)

Developing dense, affordable, multi-family, transit-oriented housing (without displacement)

Reduction of minimum parking requirements in / near commercial areas

Moving back urban growth boundaries to allow for more housing

Zoning flexibility to allow for more housing, such as auxiliary dwelling units

Banning new gas stations (where needs are reasonably met)

Comments (optional) - Please use this space if you wish to comment on or clarify any of the choices in the last segment.

9. Please rate your level of support/lack of support for each of these environmental protection and equity measures to the best of your ability*

Ellen: Your Q&As belong to your agency. San Francisco has new plan for San Franciscans. My new administration will survey to get answers and solutions from residents. We will run our city without globalists' evil plans. Our city belongs to the People. Resource: <https://stopworldcontrol.com/>

I would like to lead on this issue

I am likely to support this

Neutral / I don't know

I am not likely to support this at this time

Supporting programs that educate low-income households about low-cost electrification and weatherization

For County-wide programs, implementing your jurisdiction's climate action plan first in areas disproportionately affected by toxic emissions

Appointing people who are most affected by pollution or greenhouse gas emissions to local or regional boards and commissions

Opposing new fossil fuel infrastructure, e.g. export facilities, refinery expansions, new drilling/fracking

Working on EV charging solutions for people with street-side parking and in multi-family dwellings.

Supporting programs that educate low-income households about low-cost electrification and weatherization

Working on EV charging solutions for people with street-side parking and in multi-family dwellings.

Comments (optional) - Please use this space if you wish to comment on or clarify any of the choices in the last informational question.

Will you agree to our pledge at 350 Bay Area Action not to take Fossil Fuel money? In particular, will you pledge not to knowingly take any contributions over \$200 from the PACs, lobbyists, or SEC-named executives of fossil fuel companies? These are companies whose primary business is the extraction, processing, distribution, and/or sale of oil, gas, and coal.

*

Ellen: Your agency is part of the agenda for 2030. It has been organized by plan and by design. Thank God, agenda 21 failed. Thank you for waking me up from the mockingbird media. As a staff, you may not know. But now you know:

<https://stopworldcontrol.com/climate/>

Yes

No

Have you signed or will you sign the public, national No Fossil Fuel Money Pledge which names all of the above agreements, and also states that candidates will not take money from energy utilities that get more than 50% of their electricity, or revenue from business in, fossil fuels? (<https://nofossilfuelmoney.org/>) - This is not a requirement for endorsement, but we strongly support the effort to raise awareness of the power of fossil fuel lobbying in politics.*

Ellen: I am a firm believer in natural cause and human nature. God gave us freedom and all the resources for us to live a free life. But Satan and Satanic leaders are sick and evil, trying to remove God's people and God's freedom from the world. Learn from here resource: How Climate Change is Used to Remove Your Freedom:

<https://stopworldcontrol.com/climate/>

Yes

No

Experience

In the following three boxes please list 3 specific climate action and/or environmental justice-related activities you have been actively involved with in the last 5 years. Include activities such as pushing for legislation, initiatives, programs, non-profit and other organizations, campaigns, etc. Please list the Organization, Activity, Your Role in it, And the Year(s).

Ellen: I believe in people helping people is a way to manage our environment and planet. I believe God is the center of our life. God created and God provided. God woke me up from a climate change scam that I learned from here: <https://stopworldcontrol.com/climate/>

1. Activity, Organization, Your Role, and Year(s)
2. Activity, Organization, Your Role and Year(s)
3. Activity, Organization, Your Role and Year(s)

Is there anything else you'd like for us to know about your positions, vision, and experience (or anything you'd like to explain about your responses in this survey)? You may answer in detail here (include links if you like).

If you have any files you'd like to share (documents or audio/video, etc.) to help us know more, you may email us any files - at electoral-endorsements@350bayareaaction.org

Vote for me, vote for the truth, vote for change. Vote for the protection of your freedom. Together, we will restore law and order. We will transform San Francisco which everyone loves to call it home. Thank you.

Ellen: Yes, thank God for your Q & As. I appreciate your honesty. I believe many of the staff were never told about the truth. Many people may not know God, the God of Abraham, Jacob, and Isaac, and the God of America. Time for you, each of your staff come to learn the truth, the truth shall save our nation. The truth shall save you from the Climate Change scam created by the deep state, globalists, aka the One World Order government, to control you me, or the world for their evil gain. Wake up, please. Pray for Americans to wake up from all these lies we are forced to see in the media! Wake up! [The ReAwaken America Tour | TimeToFreeAmerica.com](#)

May God bless each one of you who read these questions and answers.
